

GENERAL MANAGER'S REPORT

June 29, 2007

TO: Board of Directors

FROM: Craig E. Anthony, General Manager

SUBJECT: **Law Enforcement Program - Traffic**

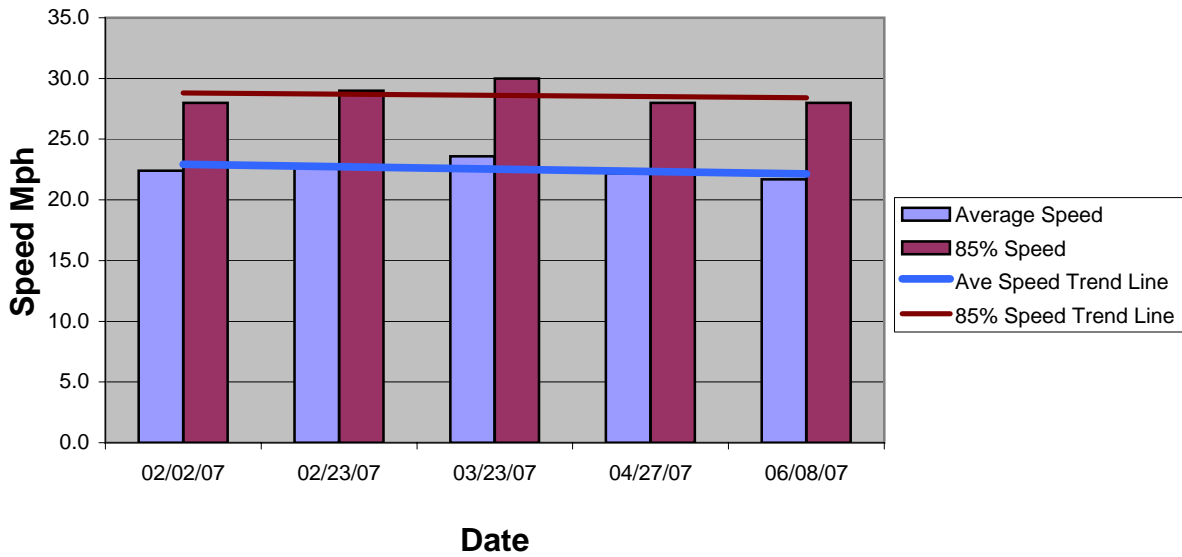

The attached speed data indicates the majority of traffic speeds remain at, or below, trend for the last five months. The average speeds in residential zones remain below the posted 25 mph speed limit with the exception of sections of Sloat, Forest Lodge, and Sunridge. It appears a combination of road width and the traffic enforcement experience contributes to motorists assuming that there is a reduced probability of receiving a traffic citation at slightly higher speeds. However, the average speed on these higher traveled thoroughfares remains well under 30 mph per hour.

The Pebble Company, at District request, installed six 25 mph speed limit signs in residential areas near the transition point from higher speed limit zones.
